

docSource® Email Management Software

docSource® Email Management Software is the only tool designed primarily for accounts payable recovery auditing.

- **CAPTURE:** Archive Outlook, Exchange, Notes and most document types into a single content database.
- **FILTER:** Eliminate duplicates and perform rules based exclusion/inclusion filtering to restrict confidential Emails and categorize others by specific content.
- **INDEX:** Full text indexing on Email body and attachments, conversational indexing, and joining of other business information for additional index capabilities.
- **DISCOVERY:** Web Base Quick-Search, full text and "Conversational" search options with secondary drill-down capabilities. Includes comments, status codes, content analytics and more.

FEATURES

Below are a few of the many features of **docSource®**:

- Capture of Email from Outlook, Notes, etc.
- Non-invasive to existing client Email system
- Capture from workstation, backups, or journaling
- Elimination of duplicate Emails
- Full text search on Email and Attachments
- Conversational search on Email and Attachments
- Email Exclusion/Inclusion rules by project
- Web based search & discovery application
- Customized content analytic services

PARADIGM SHIFT

- Business correspondence has migrated to Email
- 90% or more of price changes, amendments to PO's and changes to terms are communicated via Emails and their attachments
- Audit trail and research capability diminishes without access to Email
