

Recently, there has been a paradigm shift in the hierarchy of the Recovery Audit industry with added emphasis placed on the identification of the root cause of errors. As a result, internal recoveries have increased and external claims have declined. This, however, has added pressure on Accounts Payable departments to reduce recovery claims and created the need for additional IT support. FLEXTECS is a multi-faceted technology firm that services both internal and external Recovery Audit teams. In addition, FLEXTECS provides customized data analytics and Email discovery tools that enhance and expand the recovery process. We offer a complete suite of robust audit tools that help our clients eliminate lost profits.

FLEXTECS's recovery audit specialists have unparalleled experience in the recovery audit industry. We pledge to commit this experience to your company with our unique combination of big firm experience with a small firm's dedication to client service.

Does your company have a significant number of suppliers and pay hundreds of invoices each week? If so, there is a high probability of overpayments being made – resulting in loss revenues.

Whether you need 100% outsourced Post Audit Recovery, IT support for your Internal Audit team or IT services for an external Post Audit Recovery firm, let FLEXTECS develop a program that fits your needs and budget.

Some of the benefits of a FLEXTECS Recovery Audit:

- Pay-for-Performance pricing model
- Standard and custom audit exception reports
- Client specific analytics development
- Audit support tools, including Email capture
- Recommendations for process improvements
- Secured 24/7 Web delivery of reports and data

Our services include the following audit areas:

- Accounts Payable
- Electronic Vendor Statements
- Transactional Reporting
- Contract Compliance
- Pricing Exceptions
- Freight Routing Guide Compliance
- Advertising Media Expense
- Transaction Tax Audit
- Abandoned and Unclaimed Property
- And many more.....
